06:00 - 08:30	10:00 - 12:30	10:00 - 12:30	10:00 - 12:30	16:00 - 18:30	

**Please Note**

- Load shedding will only be implemented as a last resort if supply cannot meet demand and the power system is placed at risk
- Eskom will communicate openly by announcing a system emergency should it become necessary to implement load shedding.
- If no load shedding announcement has been made, and loss of power occurs, please report this to the Eskom's customer contact centre at 086 003 7566.

**How does the schedule work?**

- Load shedding will take place for 2 hours at a time in most instances, with the exception of the Johannesburg Area that will be load shed less frequently but for 4 hours (in alignment with the City Power schedules).
- There are three stages of load shedding, designed to cater for only the level of demand reduction actually required (Stage 3 being the highest reduction requirement).
- Eskom will communicate at the time which Stage of load shedding is being used.

**Load shedding updates**

- While we have taken care in developing the schedules, updates may be made as customers interact with us, and to optimise the schedules for changing conditions. We recommend that you view Eskom's website regularly to download any updates on <http://loadshedding.eskom.co.za>

**How will we communicate?**

- Updates on the power system status will be shared in the media.
- Watch out for the Power Alerts on SABC and DSTV and Eskom Power Bulletin broadcasts after the SABC news in the evenings.
- We welcome suggestions and comments. Please engage with us on [loadshedding@eskom.co.za](mailto:loadshedding@eskom.co.za) or call Eskom's customer call centre on 086 003 7566
