- 1.3 For contracts with a Rand value above R500 000 a maximum of 10 points may be allocated for specific goals provided that the lowest tender scores , 90 points for price (90/10 point system)
- 1.4 Any other acceptable tenders which are higher in price must score fewer point's , on a pro rate basis, calculated on their tender prices in relation to the lowest acceptable tender , in accordance with the prescribed formula.
- 1.5 The contract must be awarded to the tenderer who scores the highest points unless objective criteria justify the award to another tenderer.

2. The 80/20 preference point system

- 2.1 The following formula must be used to calculate the points for price in respect of tenders/procurement with a Rand value equal to, or above R30 000 and up to a Rand value of R500 000.

$$p_s = 80 \frac{fl-pt - P_{min}}{P_{min}}$$

Where

P_s = Points scored for price ' P_t = Rand value of tender under consideration P_{min} = Rand value of lowest acceptable tender.

- 2.2 A maximum of 20 points may be awarded to a tender by achieving any of the preferment points or specified goals.

3. The 90/10 preference point system

- 3.1 The following formula must be used to calculate the points for price in respect of tenders/procurement with a Rand value above R5000 000.

$$PS = 90 \frac{(1-pt - Pmin)}{Pmin}$$

Where

Ps = Points scored for price

Pt = Rand value of tender under consideration

Pmin = Rand value of lowest acceptable tender

- 3.2 A maximum of 10 points may be awarded to a tender by achieving any of the preferment points or specified goals.

$$NEP = NOP \times \frac{EP}{100}$$

Where

NEP = Points awarded for equity ownership by an HDI

NOP = The maximum number of points awarded for equity ownership by an HDI

EP = The percentage of equity ownership by an HDI within the enterprise or business.

- 4.10 The maximum number of points awarded for equity ownership by an HDI as follows:
